

Leader don't follow steps  
... marks the way

Post 110

Post 85

## WHAT ARE THE MARKERS POST?

The **Post 110** and the **Post 85** are flexible stakes produced in different material like our exclusive Poliflexy®, (also in polyethylene or Vitemflex®). The device can be placed with a heavy base for more stability.

## WHAT PLASTIC POST DO?

Mark limit zones perfectly in a safe manner. Part of the equipment for Protected Bicycle Tracks.

## RECOMMENDED USE

Useful and imperative in road works, deviations, parking lots or to signalise different events on road, like accidents or risky zones.

## FEATURES

- Effective and flexible post to mark different zones.
- With a grip in top for easy handle, for move from a location to another; the grip also works as a support for a Barricade Tape (Codes: CIN-PRE & CIN-PEL), a Plastic Chain (Code: P-BC), or a lamp.
- This post can be used as a temporary signal in a provisional and fast way.
- Solid base for a stability guarantee.
- Body manufactured on Poliflexy® and base in PVC.
- All weather resistant.
- With U.V. ray protection.
- The post are reboundable can be impacted with vehicles multiple times and returns to its vertical position due to a probed mechanism and its flexibility.
- The post is also strong recommended to confine bicycle protected lanes.

Measures are nominal  
and can vary,  
between +- 2%
