UNITY IS STRENGTH

The nestable barrier is an innovative and convenient solution for road safety.

Road safety device for an ample variety of uses, including delineation, signage and cordoning off of events, providing a greater safety and reducing storage and transportation costs. Perfect to block roads, sign works, manage changes and separate lanes, also for detours and guide transit.

Suitable to delineate sport activities and special events. Nestable barrier provide an efficient, safe and economic solution for any signage and delineation need in public spaces and events.

Features

- Barrier with modular system of easy assembly, exclusive on market.
- Ease of transportation and storage. By being nestable occupies less space.
- Saves up to 75% in storage and transportation costs.
- It can be adjusted to different lengths according to specific needs of project or event.
- Manufactured in high density polyethylene in orange color with UV protection, providing a long life span, resistant to inclemency and temperature changes.
- Two engraved chevrons per side to add white reflective sheeting (optional), increasing night visibility.
- Fast and safe installation of male-female system; able to assemble by one person with a minimum effort.
- Ideal to guide people to safe places.
- These features make of nestable traffic barriers an efficient and convenient option for traffic management and control.
