

The most functional and affordable barrier...

of Mexican Market

WHAT'S A ROADWEILER BARRIER?

Modern and versatile traffic safety barrier, due can confine in linear or curve shape perfectly; easy to handle thanks to its assembly system.

Its main function is cordon off work or prohibited zones, also used to delimit roads safely.

Is suggested to close streets, toll booths, and others.

Features

- Manufactured in high molecular weight polyethylene.
- UV protection.
- Round borders to prevent injuries.
- Lightweight device and easy to handle.
- Lower bridges for water flow.
- Can be operated by forklifts.
- Caps for filling and draining.
- Option to increase weight, and strength if filled with water or sand; it is recommended to fill up to 30% of its capacity.
- Two 20 x 100 mm reflective stripes per side.
- Male-female coupling for an easy placement in straight or curve row.
- Useful to delimit, sign or provide security in work zones.
- Guides transit to the correct lane.
- Barrier with long shelf life, and great resistance to inclemency.
