True leaders do not follow  
...they lead the way

## WHAT IS A BARRICADE?

- Portable device, perfect for applications requiring access restriction.
- Features a 39.37-inch tall cone with a sand-filled base to prevent tipping, a barricade holder (single or double), and a 78.74-inch long barricade.
- Can be used without the need for cables or fasteners.
- Ideal for traffic control on roads or around construction sites, serving as preventive or stopping barricades, as well as for diversions.
- Plastic barricades are also effective for crowd control.

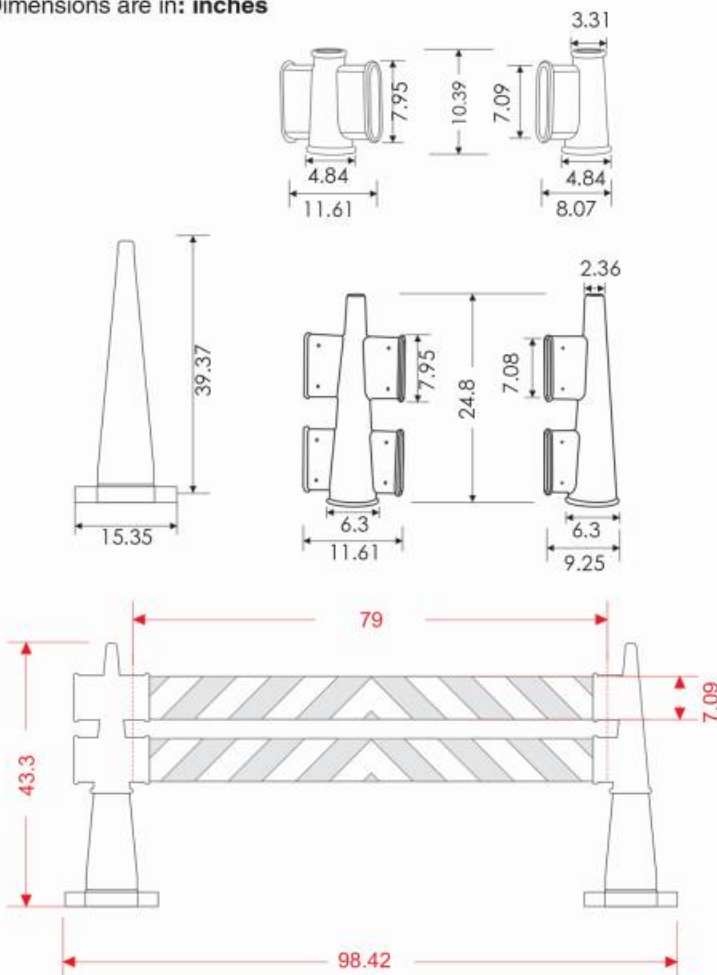

## Features

- Made from polyethylene.
- Durable construction due to high-quality materials and manufacturing methods.
- Available as single or double barricade.
- Orange cone, yellow barricade holder, and orange barricade.
- Barricades feature reflective elements for high visibility from a distance.
- Lightweight design makes these barricades highly portable, ideal for construction sites and temporary events.
- Lower transportation costs due to their weight and stackable design.
- Reusable multiple times.
- Portability and lightweight design allow two people to handle and install them easily.
- Easy to lift, relocate, and store when not in use.
