

True leaders do not follow
...they lead the way

STAY DRY ON RAINY DAYS

Full-body rain cape with sleeves, designed for effective rain protection and unrestricted freedom of movement. Manufactured from highly durable, 100% waterproof material that provides excellent durability and comfort for outdoor work.

Attached hood for added protection.

Lightweight, comfortable, and easy to put on over clothing.

Suitable for urban, roadway, industrial, and outdoor use. Recommended for operational personnel, work crews, traffic control personnel, maintenance teams, and civil protection and emergency response personnel.

Product Features

- Protective rainwear manufactured from 80% PVC and 20% polyester in high-visibility yellow. The cape-style design with adjustable sleeves provides comfort and protection against water
- Features a drawstring-adjustable hood and plastic snap buttons along the sides for a practical and secure closure
- As a 100% dielectric garment, completely free of metal components, this practical solution reduces the risks associated with electric arcs and electrical discharge in workplace environments
- **Dimensions:** 25.0 in × 31.0 in (one-size-fits-most)
- **Design:** Lightweight, ergonomic, and resistant to wear from continuous use
- **Primary use:** Protection from rain, wet environments, and liquid handling

Recommended Applications:

- Construction and general maintenance work
- Cleaning and industrial sanitation tasks
- Operations in slaughterhouses, food processing facilities, and industrial washing environments
- Fishing activities and the handling of wet materials
