POLIFLEXY® CONES BENEFITS

Poliflexy® cones are five times more resistant than PVC cones. Our cones last about 10 years without losing their color or breaking. This is because its UV protection and its registered polymeric formula.

WHAT ARE POLIFLEXY® CONES FOR ?

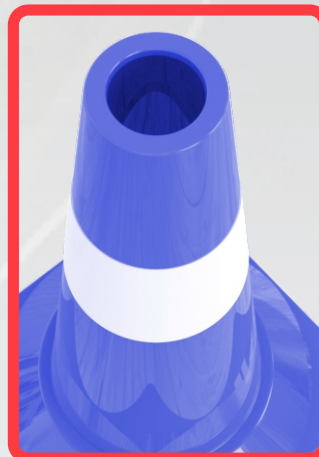

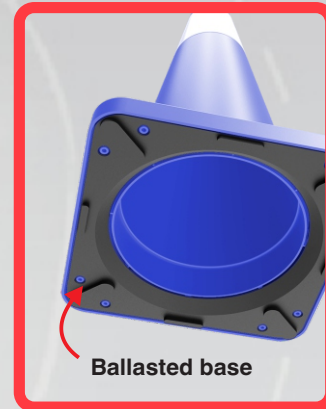

Warning on highways to alert drivers about construction sites, accidents or any mishap. Perfect to be used in parking lots or to carry them in the car trunk. They are stackable for easy transport and store.

RECOMMENDED USES

Mainly recommended for construction sites, during road repairs. Places where it is necessary to warn about danger sites or traffic deviations.

FEATURES

- Flexible cones in 3 sizes (height): 17.71", 27.95" or 35.82".
- Optional heavy base versions to provide greater weight (height): 17.87", 28.22" or 36.10"
- Bases are firmly attached to cone body by a heat seal, creating an inseparable union.
- Single piece body made of Poliflexy® which gives it great flexibility and high resistance to impacts. Its recover original shape after impact.
- With protection against UV rays from sun.
- Available colors: orange, yellow and blue, (other on demand).
- Stackables for easy transport and storage.
- With reflective ring for better visibility at night (optional).
- The special design allows a flash lamp on top. (optional).
- Heavy base versions are ideal for heavy traffic, for all weather condition.

Measures are nominal and can vary between +- 2%.

MEASURE	
CNFI-45	Height: 17.71 in. Base: 10.82 x 10.82 in.
CNFI-45-BP	Height with heavy base: 17.87 in.
CNFI-71	Height: 27.95 in. Base: 14.56 x 14.56 in.
CNFI-71-BP	Height with heavy base: 28.22 in.
CNFI-91	Height: 35.82 in. Base: 14.56 x 14.56 in.
CNFI-91-BP	Height with heavy base: 36.10 in.
Reflective:	White color ring, 3.93 in.
