

A leader doesn't follow steps
... he marks the way

Features

- On highways and roads, this warning helps delimit lanes and it's especially designed to substitute the typical road hard shoulders with this new engineered flexible item.
- They are white posts of around 40 inches high.
- They are placed at both sides of traffic flow marking the road limits. Its important function is more notorious at night.
- It perfectly indicates the direction of the road to drivers with a reflective band on top.
- Made of highly flexible and resistant PVC.
- The corners and edges are rounded and have no metallic parts inside, so it's absolutely harmless for drivers, vehicles, passers-by or fauna.
- It's immune to weather conditions, corrosion, oxidation and it's well protected against UV rays for ten years. (You are saving in future replacements).
