WHAT'S A DELINEATOR POST 85?

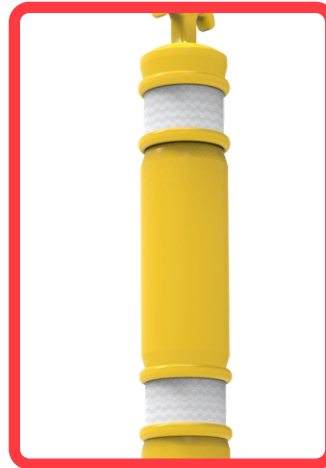

A flexible post manufactured on Polyflexy®. It can be accompanied by a heavy base which creates more stability.

Its main objective is to delineate zones in efficient and flexible ways.

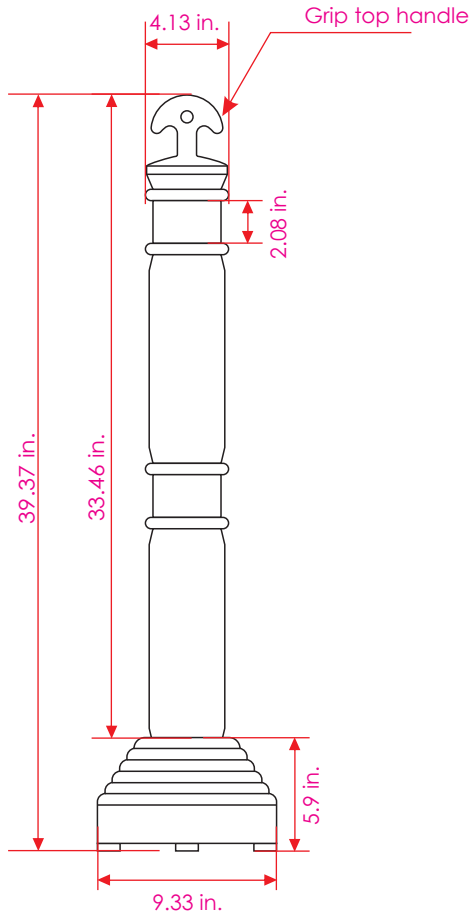

They are made in vibrant colors to draw attention. Also, they are commonly used in roadworks, traffic diversion, parking lots, warning about potholes, etc.

FEATURES

- Efficient and flexible post that delineates zones.
- The most important feature is that after numerous hits continues to maintain its vertical position.
- Easy to handle. You can tie different attachments like a barricade tape, a plastic chain, or a flashing lamp.
- The post can be quickly used as a temporary signal. Easy to replace.
- The body is made of Poliflexy® with a solid PVC base.
- The solid base provides great stability.
- Weather-resistant and extreme temperatures resistant.
- UV protection.
- 2 reflective stripes for better visibility at night.
- Color: Traffic Yellow.

Volumes, dimensions, and other measures are nominal and may vary by approximately 2 %.
