

## COMPACT DOUBLE-SIDED FLASHING WARNING LAMP

Código: LD2-CH

### WHAT IS IT?

It is an essential safety device that delivers reliable nighttime signaling, lowering accident risk and reinforcing protection for workers and drivers.

Designed for lane separation in roadwork zones and emergency situations, this solution brings confidence and protection to every area.

### FEATURES

- Manufactured from high-strength polymer with an acrylic lens
- Features an automatic activation sensor that turns on at dusk. Includes a manual power button located on the bottom for added control
- Operates with D-size batteries (included)
- Compact and versatile design with extended service life

### PRODUCT DETAILS

- Dimensions: 6.5 in (Length) × 10.4 in (Height) × 3.1 in (Width)
- Designed to work in combination with other traffic control equipment, including traffic barrels and safety cones
