

The smile is a curve...
that delineates everything

WHAT'S A SOLAR CHEVRON?

This completely works with solar energy, guaranteeing autonomy and energy savings without cables neither external electric connections.

It can operate individually or in group with others.

When many units are installed can synchronize simultaneously, increasing visibility and efficacy.

Ideal for zones with fog, rain or other adverse meteorological conditions, ensuring a reliable and durable performance.

With this chevron not only ensure an effective and constant protection, but contribute to the effective use of resources by using solar energy.

2 year-warranty for hidden faults and or manufacturing faults.

Comply with NOM-034-SCT2/SEDATU-2022

Technical Features

- Manufactured in solid materials and robust design for possible vandalism-attempts and severe haze conditions.
- Body manufactured in black color polymer, designed in a single piece.
- Resistance to inclemency and temperature changes, with UV protection.
- Long life span due it doesn't rusts.
- Electronic system against water (IP68).
- Recyclable.
- It mounts easily on reinforced 2" x 2" Posteflex, offering a fast installation and superior durability to vandal-acts.
- Reflective background in yellow color with arrow in black vinyl, guaranteed adherence.
- Chevron with arrow to the right or left, depending the circulation way.
- Zero resale value due polymer material, avoiding thefts.

SOLAR LIGHTING SYSTEM

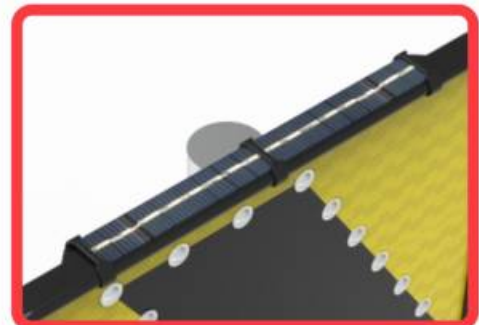

- 1.5 x 15.7 in solar panel.
- 30 LEDs in amber color with conical optics with mirror, causing light expansion, surrounding the arrow that indicates the way of circulation.
- 2 batteries of 1.5 V
- JVM electronic circuit that synchronizes the flashing of chevrons at the same time.
- It charges during 6 hours under sun, lasts 24 hours ON in flashing mode
