

ABS SUPER ROAD STUD

TP-25

Features

- A trapezoidal-shaped safety device.
- An accessory designed in ABS plastic for work protection.
- The resistance to UV rays and weather guarantees its long working life and avoids breaks.
- Easy to clean. It has resistance to liquids and solvents.
- It frequently serves as a lane separator or speed bump on medium and high-speed highways.
- It has four amber or red reflective stripes on its front of 2.4 in² to increase its visibility at night.
- Two plastic bolts (optional).
