

## Features

- This Electric Super Road Stud is perfect for boosting road visibility in low light conditions.
- It's auto-rechargeable: it lights up automatically at night due to its solar technology of a high-capacity battery and a self-activating light system.
- Highly visible under any weather conditions.
- It's manufactured in aluminum with amber acrylic spheres.
- It's perfect for signaling or guiding a route, areas of fog, freeways, low light areas, parks, etc., or for decorating public squares.
- Highly resistant to friction, abrasion, hits, and bumps.
- Lightweight and smooth body without edges.
- It's perfect as a speed bump or as a vibrating pavement marker.
- It has two bolts for higher gripping to the ground.

## Technical specifications

<b>Material:</b>	Stainless steel.
<b>Total weight:</b>	3.32 lb.
<b>Mini solar panel:</b>	Silicon.
<b>General measures:</b>	Length: 9.55 in. Width: 4.44 in. Height: 2 in.
<b>Color:</b>	A set of spheres that spread the light.
<b>LEDs' wear-out life:</b>	100,000 h.
<b>Luminous intensity of each LED:</b>	More than 5,200 millicandelas.
<b>Flashing light sequence:</b>	Flashing or fixed.
<b>Body color:</b>	Natural steel.
<b>Approximate distance of LED visibility:</b>	218 yd
<b>Power efficiency:</b>	36 h. working with 7 h. charging in direct sunlight.
<b>Smart on/off switch.</b>
