... marks the way

## FANTAFLEX: "CARMELS" OR "PHANTOMS"?

This safety device for works protection is known as "phantoms" or "carmels", is a signalise black or orange with texts on black, or with black strips and diagonal white reflectives.

## WHAT ARE FANTAFLEX PURPOSE?

This black and white Pallet is useful to channelize the drivers to a place more secure out of road or construction works. Also to call attention on matters that could affect smooth traffic flow or transportation.

## RECOMMENDED USE

The signal is useful for mark obstacles and else, probably a big hole on ground, always putting first safe and security.

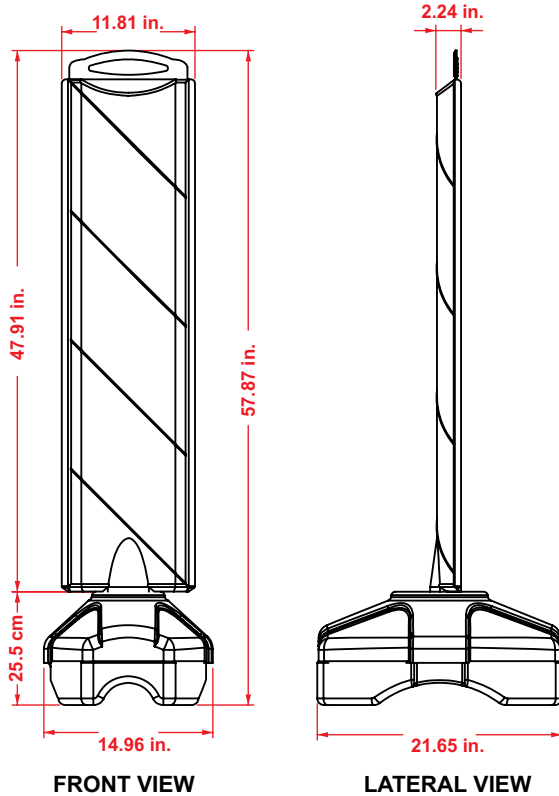

## Features

- Best option for replace dye cast sheet metal signs on road, known in some places as "phantom" (because appears in white color during nights) or caramels...
- Contributes to create a more safety and a high standard environment.
- Made out in polyethylene.
- Its heavy base helps not to be torn down by wind, it gives bigger stability.
- Its recommended to fill this base with sand for solidness.
- Its body has a handle atop for a comfortable driving and displacement.
- Its durability is a key thinking on replacement savings.
- With a large reflective zone specially for dark nights.
- The fantaflex pallets are completely stackable making transport more easy.
