

A leader doesn't follow steps
... he marks the way

What's a Multipurpose Barrier?

A one-of-a-kind safety barrier. It's versatile because it has interchangeable legs and easy to handle thanks to its exclusive coupling.

The main function of these barriers is to avoid vehicles entering forbidden zones, they are road safety delimiters.

It can be used as rows or curves and contribute to a safer environment.

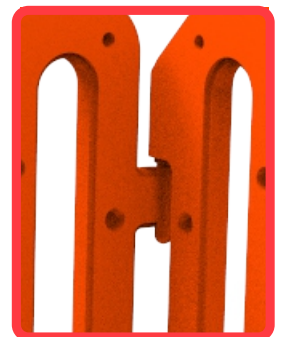

Thanks to its features is one of our Premium Exportation Products.

FEATURES

- The **Multipurpose Barrier** can delimit, mark, and cordon off events providing security.
- It's useful for guiding crowds to an indicated place. Two swivel legs facilitate its piling and transport.
- Made of high molecular weight polyethylene.
- Colors: blue, orange or black (other colors upon request).
- The uniformity of the thickness of the walls improves its daily performance.
- It has stability and firmness on its legs since they could be solid or light.
- Weather-resistant for long working life.
- UV protection.
- Completely stackable for easy transportation.
- The modular design integrates a coupling system (male-female) for a strong link between barriers so you can create straight or curved routes.
- The coupling system is quite simple and can be assembled by one person.
- The barrier has a space in the center for your message.
- It includes reflective that at night improves its visibility.
- It has the option of adding 3" swivel legs with wheels that improve its maneuver.
- Up to 35 barriers can be stacked.

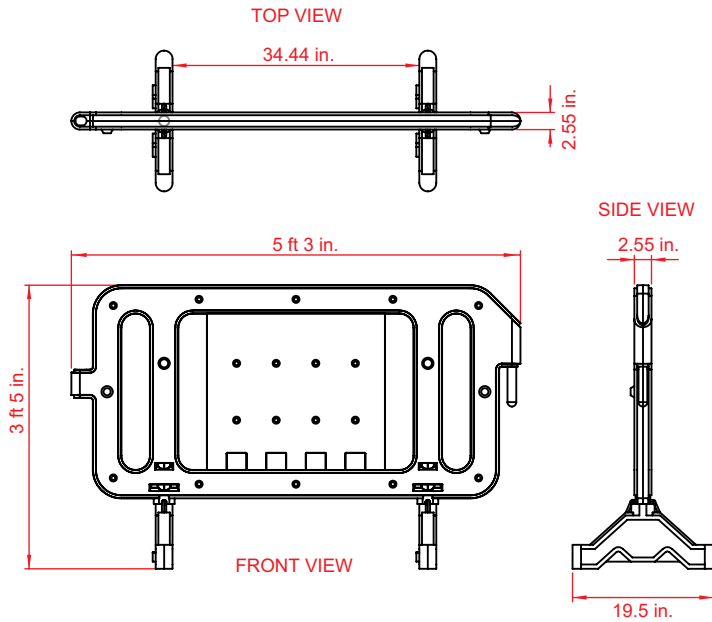

Up to 35
barriers can
be stacked.
