

A leader doesn't follow steps
... he marks the way

WHAT'S A SPEED HUMP?

They are devices of speed reduction placed over the asphalt surface, constructions, or temporary events, whose purpose it's to maintain the traffic speed reduced throughout specific sections of the road.

WHAT DOES A SPEED HUMP DO?

Its main function is to reduce the motorist's speed at checkpoints.

USES

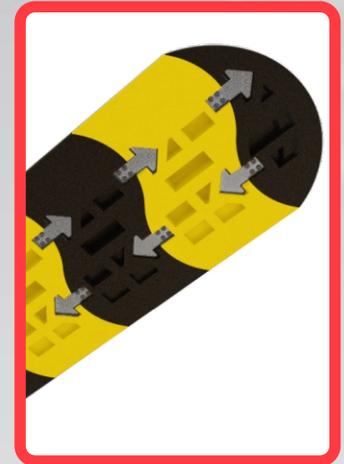

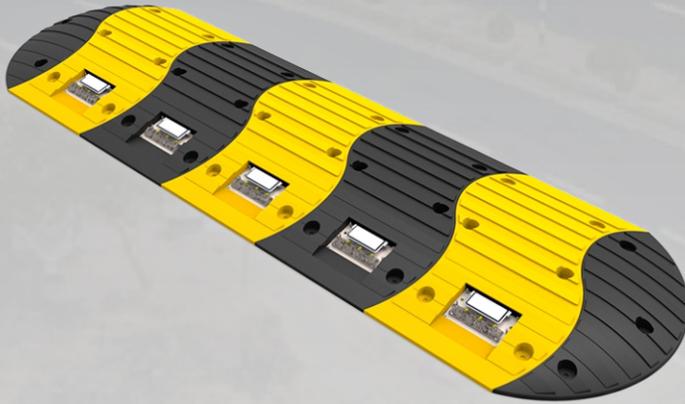

It's mostly recommended in **schools, checkpoints, hospitals, and places where it's necessary to reduce the speed.**

Features

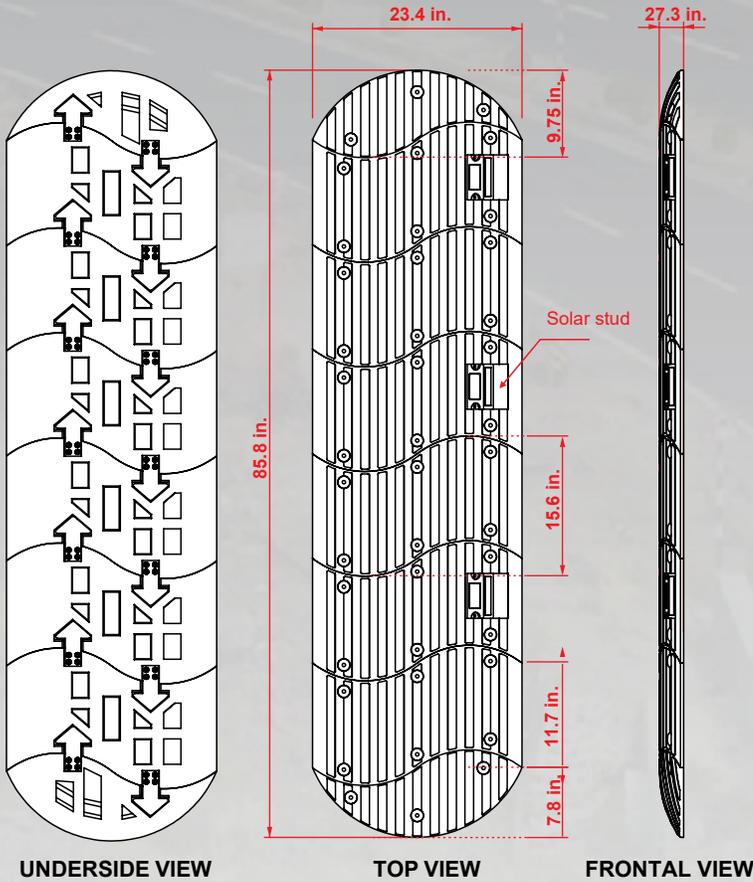

- The modularization of the R-S-81QP makes it a temporary device.
- Its dynamic form makes it a user-friendly speed hump with the city.
- Made of polyethylene, a material that doesn't damage vehicles.
- Its anti-skid surface makes it safer.
- It can bear up to 38.58 US t.
- It's ideal to use in areas and times of big surge of heavy traffic or to retain it.
- Color: Black and yellow of great duration.
- Easy to install without the need for anchors. Its assembly is made of steel plates in the shape of an arrow.
- Another feature of the R-S-81QP is that it has the option of adding light.
- The speed hump with light is made up of LED studs. This helps the driver with improved visibility at night.

SOLAR STUD FEATURES

- A stud with a smart solar power system.
- Solar panel and high-efficiency electric system.
- Translucent amber and blue LEDs with an operational angle of 30 degrees.
- Flash frequency of 3 Hz.

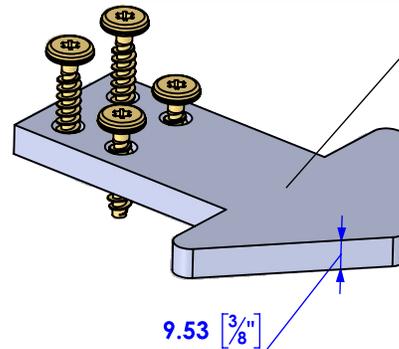

Volumes, dimensions, and other measures are nominal and may vary by approximately 2 %.

Measures

Total	Width: 23.4 in.
	Length: 85.8 in.
	Height: 2.73 in.
Reflective:	None
Reflective color:	None
Approx. weight:	Middle sections 15.4 lb.
	End caps 5.5 lb.

The assembly of the speed hump without anchors through steel plates with the shape of an arrow of 9.53 mm (3/8 ") and 4 lag screws.
