

Leader don't follow steps
... marks the way

FEATURE

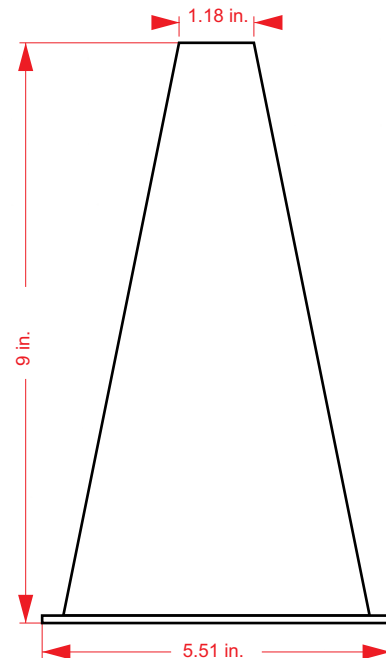

- Rigid cone, the most demanded in schools.
- Quadrangular base made out in one piece.
- Shock resistant.
- Can be use as a traffic deviator.
- Cones are common markers on roads to redirect traffic in a safe way on a temporary basis.
- Useful to distribute lanes, to separate or to merge them, during works on-road or to make a warning due to accidents.
- Can be use indoors or outdoors.
- Comply with night-work standards.
- Stackables.
- UV ray protected.
- Can carry reflective bands or without them.
- Reflective collars are very important for a better visibility.
- Idoneus size for carry in the car trunk.
